

ENVIRONMENTAL PROTECTION POLICY

Mutxamel, 07 December 2017

As a company engaged in the preparation of civil and military food rations, humanitarian aid packages, repackaging of liquid and solid food and distribution of humanitarian aid items, JOMIPSA is committed to maintaining our commitment to protecting the environment through sustainable development. Consequently, aware of the low environmental impact of our operations, we assume the duty of protecting the environment from any harm that could be caused by the activity of our divisions and product lines.

We shall act in accordance with the following principles in order to achieve this aim:

- **We respect the environment:** Environmental protection is a key factor in the course of our day-to-day work. We set up and implement waste segregation management procedures to reduce the environmental impact of residues. We study the materials we use and select them in accordance with environmental criteria.
- **Continuous improvement:** We study our processes to enhance the procedures and ensure improvement in waste generation and treatment. Ease of separating waste products.
- **Involvement of personnel:** Success can only be achieved if all company personnel are involved. Both the office and production personnel are aware of our commitment to the environment as evidenced by the tasks they perform on a day-to-day basis to separate and recycle waste properly.

- **Communication:** The Environmental Policy is disseminated among our employees and other stakeholders. We show part of our commitment in the annual reports of the Global Pact for the Environment. We carry out internal training courses with personnel to maintain and improve our environmental performance.
- **Compliance with applicable regulations:** We comply with the current environment-related legislation applicable to our company due to its activity classification and geographic location.

JOMIPSA regards its Environmental Management System as a continuous improvement tool, a system involved in the day-to-day activities of the Company and from which new ideas constantly arise to contribute to protection of the environment.

David Pascual de Bonanza Bru
